01 About Melsa

Quality. Safety. Reliability.

Melsa Elevators has been part of the elevator industry since 1997, serving residential, commercial, administrative, healthcare and industrial buildings.

We believe an elevator is more than a means of transport. It is a central part of a building's accessibility, function and everyday experience. Every project starts with understanding its requirements and ends with a lift that is safe, reliable and beautifully finished.

A word from our founder

“

After more than 40 years of experience in the elevator industry, I have learned that success is not measured only by completing a project. It is measured by the trust we earn, the quality we deliver, and the responsibility we take for every detail.

At Melsa Elevators, we approach every project with a clear understanding of our clients' needs and the practical challenges involved. Our commitment is to provide reliable elevator solutions, maintain professional standards, and remain involved throughout every stage — from initial consultation and coordination to installation and after-sales support.

Over the years, we have built lasting relationships with clients, consultants, contractors and partners. These relationships are among our greatest achievements, and they continue to guide the way we work.

Thank you for your trust in Melsa Elevators.

Adel Abdelkawy
Founder, Melsa Elevators

What drives us

Vision

To be a trusted name in the elevator industry, recognised for dependable solutions, quality workmanship and lasting client relationships.

Mission

To deliver elevator solutions tailored to each project's requirements through professional coordination, attention to detail, and a commitment to safety, quality and customer satisfaction.

01

Safety first

Every installation and every visit follows strict safety checks.

02

Quality

Selected components and careful finishing, inside and out.

03

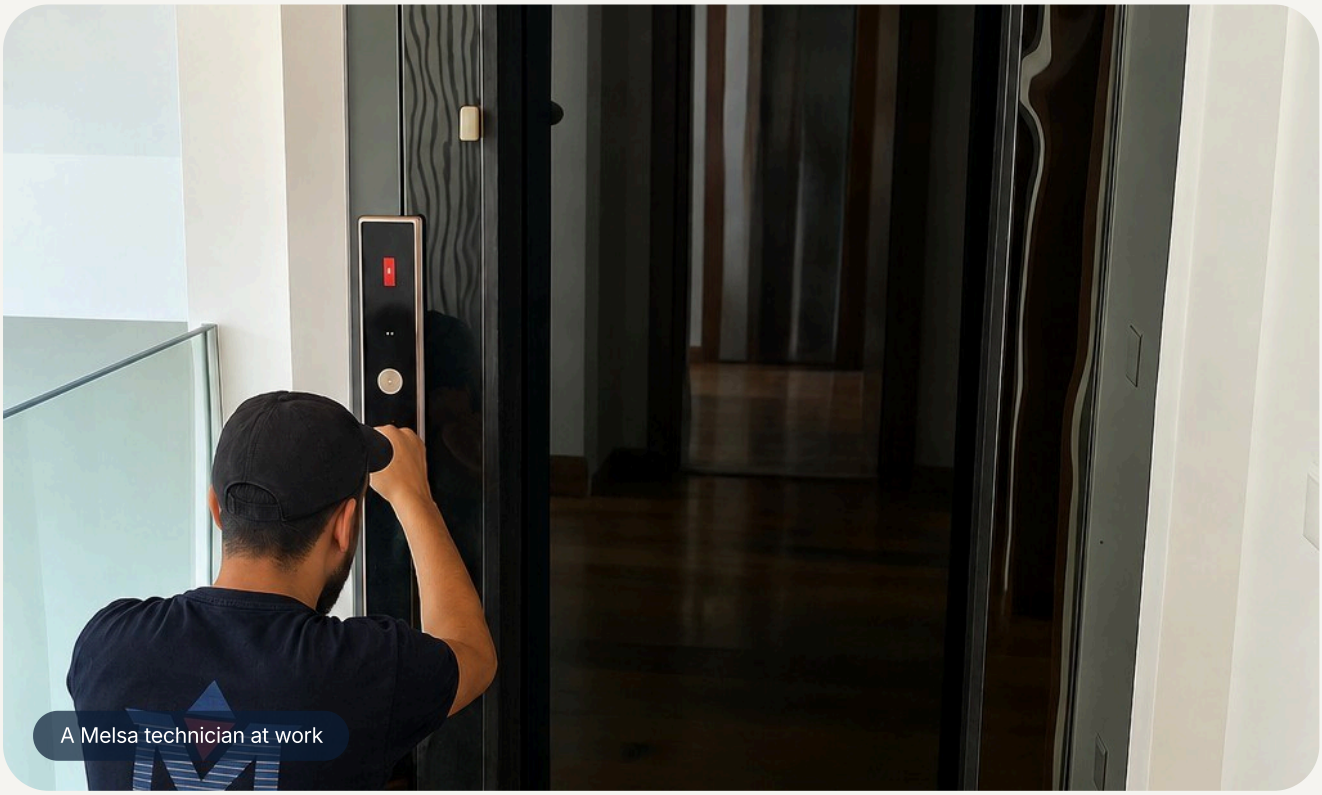

Reliability

Elevators that keep running, backed by responsive service.

04

Partnership

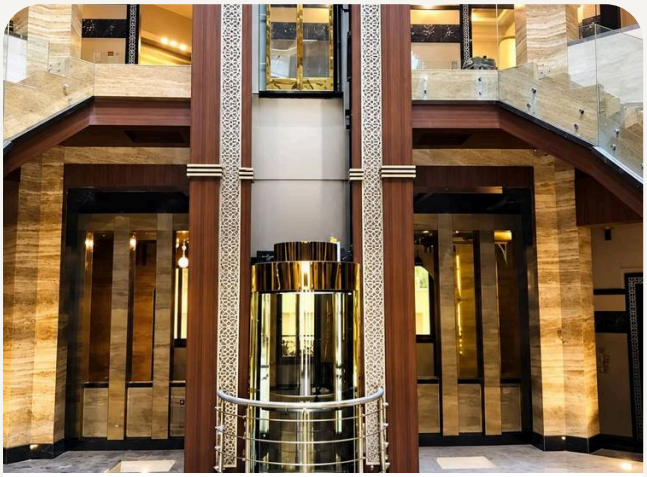

We stay involved from the first meeting to after-sales.

A Melsa technician at work

04 Our services

One partner, from shaft to service.

Elevator installation

Planning, supply and installation according to the approved project requirements, then testing and handover.

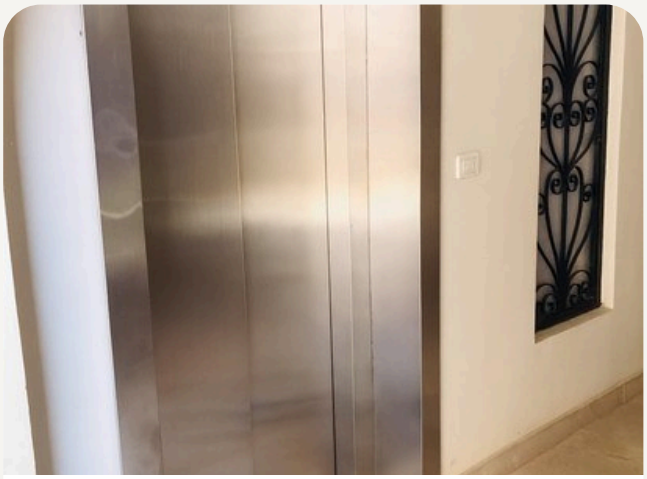

Maintenance & support

Preventive visits, fast breakdown response and safety inspections, for any elevator brand.

Modernization

New machines, controllers, doors and cabins for existing elevators, after a technical assessment.

Consultation & coordination

We work with owners, contractors and consultants to choose the right specifications and shaft design.

05 Elevator solutions

An elevator for every building.

Passenger elevators

Residential and office buildings, in any capacity and speed.

Home & villa lifts

Compact, quiet lifts for private homes and villas.

Panoramic elevators

Glass cabins and shafts for atriums, malls and facades.

Hospital elevators

Bed and stretcher lifts with smooth, precise levelling.

Goods elevators

Heavy-duty cabins for warehouses, factories and retail.

Electric & hydraulic

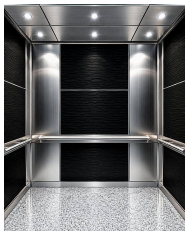

Machine-room, machine-room-less and hydraulic drives.

Your cabin. Your finishes.

Choose every detail from our catalog of more than 40 designs, many available in several colours.

07 How we work

Six clear steps.

01
Consultation
We listen to your needs, the building type and your budget.

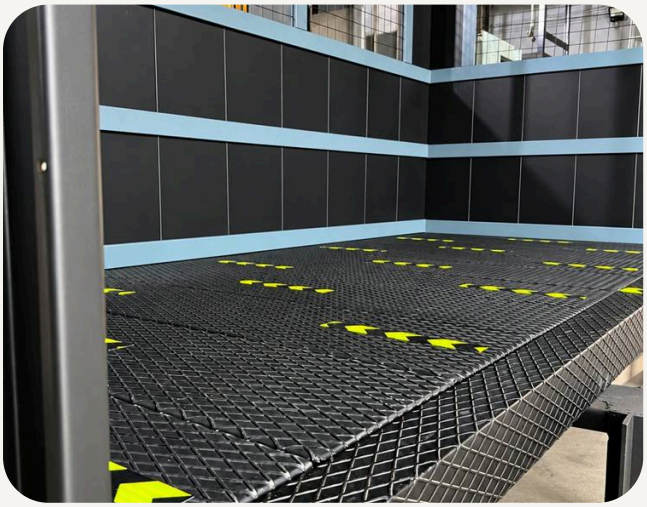

02
Site survey
Our engineers measure the shaft, pit and headroom on site.

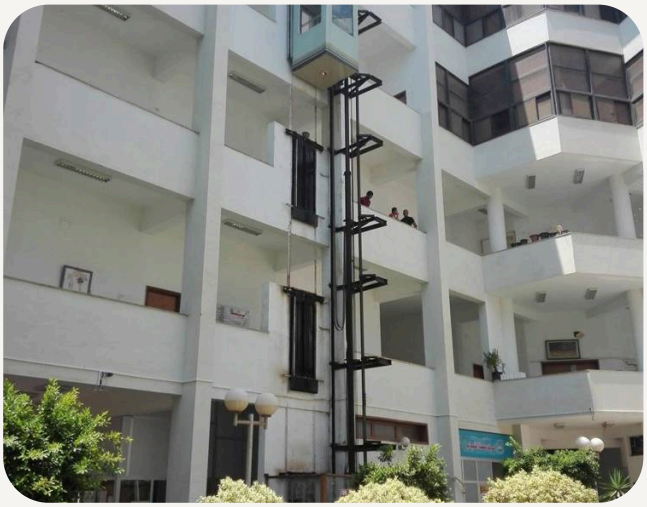

03
Design & specifications
We propose the drive, capacity, speed, doors and finishes, and send a detailed quotation.

04
Supply
Components are prepared and delivered according to the approved specifications.

05
Installation & testing
Our team installs the elevator and tests every safety system before use.

06
Handover & after-sales
We hand over the elevator, train the users and stay available for maintenance.

Why clients choose Melsa.

01

Since 1997

Decades of experience across homes, hospitals, factories and government buildings.

02

One team, start to finish

Consultation, supply, installation and maintenance under one roof.

03

Finishes that fit your space

Dozens of cabin, door, panel and floor options to match any interior.

04

Any brand, maintained

Our maintenance team services elevators from all major brands.

05

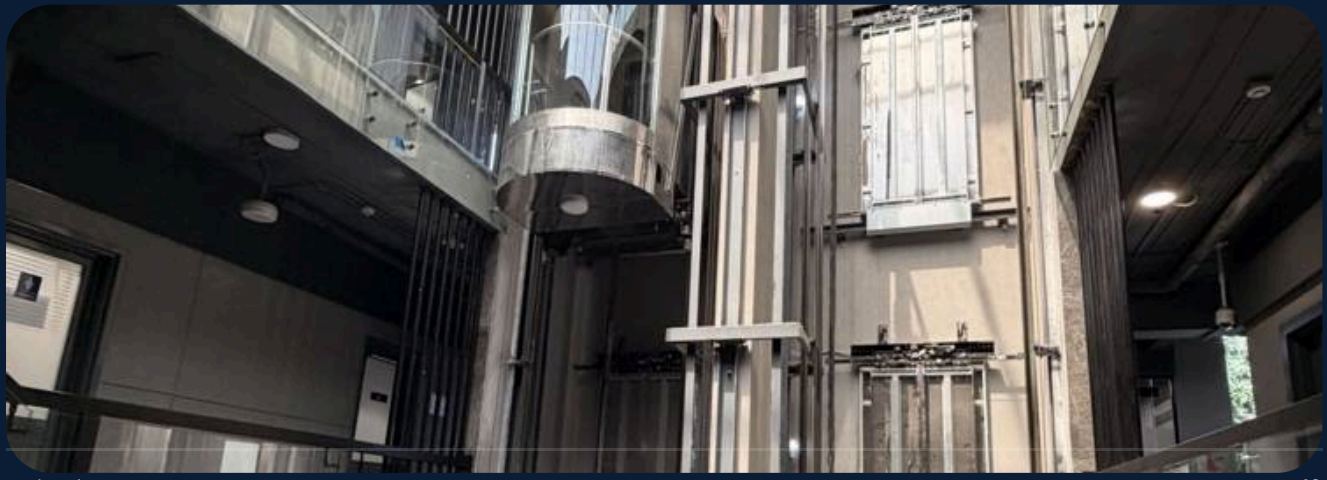

Professional coordination

We work closely with consultants and contractors to keep projects on schedule.

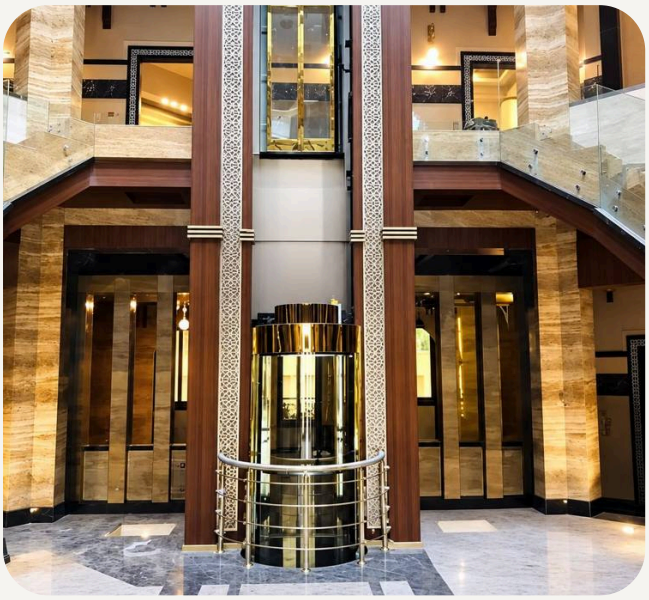

06

Responsive support

A direct line to our team for breakdowns and questions.

Work we are proud of.
